

Qiyuan (Isabelle) Hu

5035 S East End Ave, Chicago, IL 60615 | qhu@uchicago.edu | 612-360-6337

SUMMARY

- Medical physicist and imaging scientist with a focus on developing artificial intelligence methods for quantitative medical image analysis to improve healthcare
- Interdisciplinary collaborator working at the intersection of physics, medicine, computer science, and statistics
- Author of 3 publications in peer-reviewed journals including 2 first-author papers, and 4 conference proceeding papers

EDUCATION

University of Chicago

PhD in Medical Physics

Chicago, IL

Expected 2021

- American Association of Physicists in Medicine Graduate Fellowship: Awarded to one outstanding incoming doctoral student each year to support the first two years of graduate study
- American Association of Physicists in Medicine Expanding Horizons Travel Grant
- Conference on Neural Information Processing Systems Machine Learning for Health Workshop Travel Grant Award
- Biological Sciences Division Travel Award
- Graduate Council Travel Fund Award

Carleton College

B.A., Physics, Mathematics. Graduated summa cum laude with distinction in Physics

Northfield, MN

Sep. 2013 – Jun. 2017

- Patricia V. Damon Merit Scholarship: Awarded for a strong academic profile and extra-curricular accomplishment
- Dean's List in all academic years, Exemplary Writing Portfolio, Phi Beta Kappa First Year Prize
- Phi Beta Kappa honor society, Sigma Xi scientific research honor society

RESEARCH EXPERIENCE

University of Chicago, Committee on Medical Physics

Doctoral Researcher, Advisor: Maryellen Giger, PhD

Chicago, IL

Sep. 2017 – present

Topics: Artificial Intelligence for Medical Image Analysis for Breast Cancer Multiparametric MRI and COVID-19 Chest Radiography

- Develop novel computer vision methods using deep learning and human-engineered radiomic features for breast cancer diagnosis based on high-dimensional multiparametric MRI
- Collaborate with radiologist to visualize and interpret decisions of deep neural networks
- Investigate machine learning methods for COVID-19 diagnosis, prognosis, and treatment response
- Establish large-scale, open-source COVID-19 chest radiography and computed tomography database to contribute to the NIH-funded Medical Imaging and Data Resource Center

Mayo Clinic Graduate School, Department of Biomedical Engineering

Summer Research Intern, Advisors: Lifeng Yu, PhD, Cynthia McCollough, PhD

Rochester, MN

Jun. – Aug. 2016

Funded by Mayo Graduate School Summer Undergraduate Research Fellowship

Topics: Determining Human Observer Performance in Lung Cancer Screening CT

- Designed and performed a virtual clinical trial for lung cancer screening CT using 12 conditions of nodule size, nodule type, acquisition dose level, and image reconstruction method
- Analyzed human observer performance which contributed to the development and validation of model observers and protocol optimization

MIT, Department of Electrical Engineering and Computer Science

Summer Research Intern, Advisor: Mildred Dresselhaus, PhD

Cambridge, MA

Jun. – Aug. 2015

Funded by Kolenkow Reitz Fund for Undergraduate Research

Topics: Raman Spectroscopy of Low-Dimensional Electrical Biased Device

- Designed and built an experimental set up and measured the Raman spectroscopy of graphene p-n junctions, which has potential applications in electronic devices
- Prepared ultrathin samples of GaTe, a novel 2-D material for electronic devices, to study its electrical properties

Carleton College, Department of Physics and Astronomy

Independent Research Student, Advisor: Martha-Elizabeth Baylor, PhD

Northfield, MN

2015 – 2017

Topic: Intensity Loss through Optical Waveguide in a Thiol-ene/methacrylate Photopolymer

- Produced thiol-ene/methacrylate photopolymer resin
- Experimentally determined the gel point and patterning cure point of the resin
- Made microfluidic device and investigated light attenuation through waveguides of various lengths

Carleton College, Department of Physics and Astronomy

Northfield, MN

Independent Research Student and Summer Research Student, Advisor: Nelson Christensen, PhD

2014 – 2015

Topic: Schumann Resonance Measurement for noise analysis in LIGO's gravitational wave detection

- Designed and tested a circuit to collect Schumann resonance signals obtained from noncommercial antennas
- Measured Schumann resonance signals in outdoor low-noise environment to potentially subtract from signals detected by the LIGO gravitational-wave interferometers

SKILLS

Programming: Python, R, MATLAB, Java, Mathematica

Languages: English, Mandarin Chinese

TEACHING AND MENTORING EXPERIENCE

University of Chicago, Committee on Medical Physics

Chicago, IL

Teaching Assistant

2019 – 2020

- Held weekly discussion sessions, assisted in labs, and graded assignments for two courses: Physics of Radiation Therapy, Physics of Medical Imaging I Practicum

University of Chicago, Committee on Medical Physics

Chicago, IL

Research mentor

2019 – 2020

- Supervised 2 undergraduate summer research students

Carleton College, Department of Mathematics

Northfield, MN

Lab Assistant and Grader

2014 – 2017

- Assisted students with coding in RStudio, RMarkdown, and Mathematica for statistics and mathematics courses
- Graded assignments for courses including Multivariable Calculus, Linear Algebra, Ordinary Differential Equations, and Statistical Inference

LEADERSHIP EXPERIENCE AND SERVICE

Society of Photo-Optical Instrumentation Engineers (SPIE) Student Chapter, University of Chicago

Vice President, 2019-2020; Treasurer and founding member, 2018

- Organized optics-related activities, such as outreach events, Fermi lab tour, guest speaker seminars, etc.

Global Mentorship Network, University of Chicago

Chicago, IL

Mentor

2019 – 2020

- Planned monthly events and maintained regular communication with mentees in the peer-mentor program that strives to connect international graduate students from all disciplines to foster a greater sense of community

Review

- Reviewer for journals including European Radiology, Journal of Medical Imaging, Journal of Magnetic Resonance Imaging, and IEEE Transactions on Biomedical Engineering.

Graduate Council Travel Fund Committee, University of Chicago

Chicago, IL

Member

2019

- Served on the review board of the graduate council travel fund, which provides funds for graduate students to attend academic conferences, networking events, and other venues.

Committee on Medical Physics Retreat Committee, University of Chicago

Chicago, IL

Member

2019

Women in Math and Sciences (WhiMS), Carleton College

Northfield, MN

Peer mentor

2015 – 2017

OUTREACH AND VOLUNTEERING EXPERIENCE

-
- Women in STEM Club, University of Chicago Laboratory High School** Chicago, IL
Mentor 2019 – 2020
- Attend quarterly events to discuss experience as women in STEM and provide guidance for high school students navigating their way in the field.
 - Mentor a student matched based on similar academic interests through regular meetings and communication by advising her on course choices summer internship opportunities, sharing college experiences, and exploring future career options in STEM.
- Girls Who Code, Toyota Technological Institute at Chicago** Chicago, IL
Volunteer facilitator 2019 – 2020
- Coached high school students in the GWC after-school program to study computer science through online coding tutorials and build projects that solve real-world problems
- American Cancer Society Walk and Roll** Chicago, IL
Volunteer Jun. 2019
- Slow Food Chicago** Chicago, IL
Volunteer 2019
- Helped revitalize a Chicago West Side neighborhood through community gardening
 - Promoted sustainable foods and local culinary cultures as an alternative to fast food and agriculture globalization
- Science Olympiad** Chicago, IL
Volunteer Feb. 2019

INTERNSHIPS

-
- Medtronic (Shanghai) Management Co., Inc.** Beijing, China
Marketing Intern Dec. 2015
- Analyzed global cardiac rhythm heart failure market research reports and data from local market research on implantable loop recorders
 - Helped organize the 2016 China International Pacemaker Conference and the 8th annual China Pacemaker Summit
- IBM Global Business Services** Beijing, China
Business Analysis Intern Dec. 2014
- Worked on online banking development and maintenance for the Bank of China

PUBLICATIONS AND PRESENTATIONS

Journal Publications:

1. Hu Q, Whitney HM, Giger ML. "A deep learning methodology for improved breast cancer diagnosis using multiparametric MRI." *Scientific Reports* 10.1 (2020): 1-11.
2. Hu Q, Whitney HM, Giger ML. "Radiomics methodology for breast cancer diagnosis using multiparametric magnetic resonance imaging." *Journal of Medical Imaging* 7.4 (2020): 044502.
3. Gong H, Hu Q, Walther A, Koo CW, Takahashi EA, Levin DL, Johnson TF, Hora MJ, Leng S, Fletcher JG, McCollough CH. "Deep-learning-based model observer for a lung nodule detection task in computed tomography." *Journal of Medical Imaging* 7.4 (2020): 042807.

Proceeding Papers and Presentations:

1. Hu Q, Whitney HM, Giger ML. "Using ResNet feature extraction in computer-aided diagnosis of breast cancer on 927 lesions imaged with multiparametric MRI." *Medical Imaging 2020: Computer-Aided Diagnosis*. Vol. 11314. International Society for Optics and Photonics (SPIE), 2020. (Proceeding paper. Oral presentation.)
2. Hu Q, Whitney HM, Giger ML. "Transfer Learning in 4D for Breast Cancer Diagnosis using Dynamic Contrast-Enhanced Magnetic Resonance Imaging." *arXiv preprint arXiv:1911.03022* (2019). The 33rd Neural Information

Processing Systems Conference (NeurIPS) Machine Learning for Health Workshop (ML4H). Extended Abstract. Poster presentation.)

3. Hu Q, Whitney HM, Edwards A, Papaioannou J, Giger ML. “TU-HI-SAN2-9: Multiparametric breast MRI radiomics in distinguishing between benign and malignant breast lesions.” *Medical Physics* Vol. 46. No. 6., 2019. American Association of Physicists in Medicine (AAPM). (Selected oral presentation in the Science Council session. Highlighted as best of AAPM at American Society for Radiation Oncology [ASTRO] 2019 annual meeting.)
4. Hu Q, Whitney HM, Edwards A, Papaioannou J, Giger ML. “Radiomics and deep learning of diffusion-weighted MRI in the diagnosis of breast cancer.” *Medical Imaging 2019: Computer-Aided Diagnosis*. Vol. 10950. International Society for Optics and Photonics (SPIE), 2019. (Proceeding paper. Poster presentation.)
5. Gong H, Walther A, Hu Q, Koo CW, et al. “Correlation between a deep-learning-based model observer and human observer for a realistic lung nodule localization task in chest CT.” *Medical Imaging 2019: Image Perception, Observer Performance, and Technology Assessment*. Vol. 10952. International Society for Optics and Photonics (SPIE), 2019. (Proceeding paper. Oral presentation given by Gong H.)
6. Yu L, Hu Q, Koo CW, Takahashi EA, Levin DL, Johnson TF, Hora MJ, Dirks S, Chen B, McMillan K, Leng S, Fletcher JG, McCollough CH. “A virtual clinical trial using projection-based nodule insertion to determine radiologist reader performance in lung cancer screening CT.” *Medical Imaging 2017: Physics of Medical Imaging*. Vol. 10132. International Society for Optics and Photonics (SPIE), 2017. (Proceeding paper. Oral presentation given by Yu L.)
